

Goat Anti-Rabbit IgG (H+L) Antibody;HRP conjugated

Catalog No: tccua64808

Available Sizes

Size: 300ul

Specifications

Species Reactivity:

Rabbit

Host Species:

Goat

Immunogen / Amino acids:

Rabbit IgG(H+L)

Conjugation:

HRP

Isotype:

IgG

Form:

Liquid

Storage Buffer:

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Recommended Dilution:

WB:1:5000-20000

IHC:1:5000-10000

IF : 1:5000-10000

ELISA :1:10000-20000

Tested Application:

ELISA, WB, IHC, IF

Storage Instruction:

Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.

Purification:

Affinity-purified from goat antiserum by affinity-chromatography using specific immunogen.

Product Description

Goat Anti-Rabbit IgG(H+L) Antibody HRP conjugated was produced in the goat immunized by using the rabbit IgG protein as the immunogen. The target protein IgG, also known as immunoglobulin G, is a kind of immunoglobulin. It provides strong immunity to most blood-borne infectious substances and is the only one that passes The placenta provides humoral immunity antibodies to babies, which is widely used in biomedicine.

This Goat Anti-Rabbit IgG(H+L) Antibody HRP conjugated was tested in the WB, IHC, IF and ELISA applications. The HRP conjugated IgG was affinity-purified from goat antiserum by affinity-chromatography using specific immunogen. This Goat Anti-Rabbit IgG(H+L) Antibody HRP conjugated can be directed against the whole molecule of the primary antibody as a secondary antibody.
