

# Rabbit anti-Goat IgG Fab Antibody; Biotin conjugated

## Catalog No: tccua64831

### Available Sizes

**Size:** 500ug

### Specifications

**Application:**

ELISA

**Species Reactivity:**

Goat

**Host Species:**

Rabbit

**Immunogen / Amino acids:**

Goat IgG Fab fragment

**Conjugation:**

Biotin

**Isotype:**

IgG

**Form:**

Liquid

**Storage Buffer:**

Preservative: 0.03% Proclin 300

Constituents: 50% Glycerol, 0.01M PBS, PH 7.4

**Storage Instruction:**

Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.

### Product Description

The fragment antigen-binding (Fab fragment) is a region on an antibody that binds to antigens. It is composed of one constant and one variable domain of each of the heavy and the light chain. These domains shape the paratope — the antigen-binding site — at the amino terminal end of the monomer. The two variable domains bind the epitope on their specific antigens.
