

Rabbit anti-Human IgG Antibody

Catalog No: tccua64845

且.	Available Sizes
Size: 5	00ug
	Specifications
Applic ELISA,V	ation: VB;Recommended dilution:WB:1:500-1:5000
Specie Human	es Reactivity:
Host S Rabbit	pecies:
	nogen / Amino acids: rified from human serum
	gation: njugated
Isotyp IgG	e:
Form: Liquid	
Preserv	ge Buffer: vative: 0.03% Proclin 300

Storage Instruction:

Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.

Product Description

Immunoglobulin G (IgG), is one of the most abundant proteins in human serum with normal levels between 8-17 mg/ml in adult blood. IgG is important for our defence against microorganisms and the molecules are produced by B lymphocytes as a part of our adaptive immune response. The IgG molecule has two separate functions; to bind to the pathogen that elicited the response and to recruit other cells and molecules to destroy the antigen. The variability of the IgG pool is generated by somatic recombination and the number of specificities in an individual at a given time point is estimated to be 1011 variants.
