

Goat Anti-Rabbit IgG (H+L) Antibody; HRP conjugated

Catalog No: tccua64881

Available Sizes

Size: 100ul

Size: 500ul

Specifications

Species Reactivity:

Rabbit

Host Species:

Goat

Immunogen / Amino acids:

Oryctolagus cuniculus (Rabbit)

Conjugation:

HRP

Isotype:

IgG

Form:

Liquid

Storage Buffer:

0.01M Sodium Phosphate, 0.25M NaCl, pH 7.6

Recommended Dilution:

ELISA:1:500-1:10000

WB:1:3000-1:5000

IHC:1:50-1:500

ICC:1:50-1:500

Tested Application:

ELISA, WB, IHC, ICC

Storage Instruction:

Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.

Purification:

purified from antisera by immunoaffinity chromatography using antigens coupled to agarose beads.

Product Description

Goat Anti-Rabbit IgG(H+L) antibody HRP conjugated tccua64881 was produced in the goat immunized by using the rabbit IgG protein as the immunogen. The target protein IgG, also known as immunoglobulin G, is a kind of immunoglobulin. It provides strong immunity to most blood-borne infectious substances and is the only one that passes The placenta provides humoral immunity antibodies to babies, which is widely used in biomedicine.

This Goat Anti-Rabbit IgG(H+L) Antibody HRP conjugated was tested in the WB, IHC, ICC and ELISA applications. The HRP conjugated IgG was purified from antisera by immunoaffinity chromatography using antigens coupled to agarose beads. This Goat Anti-Rabbit IgG(H+L) Antibody HRP conjugated can be directed against the whole molecule of the primary antibody as a secondary antibody
